EDUCATION.

GEORGE BROWN COLLEGE

Toronto, On, Canada (2017 - 2020)

Computer Programmer Analyst

EXPERIENCE.

MY PORTFOLIO

The project is a showcase of my major projects over a year of learning web development. One of the best websites I have done since I started learning to code. I planned, designed and coded using Figma, ReactJs and TailwindCss.

COUNTRIES APP

A challenge from Frontend Mentor website is an opportunity for me to work with real world designs. It also develops my ability to handle with data from external API.

UNCLE MINIGAMES

My nephews love playing video games, so I built a mini-game for us to play with each other. It was also the opportunity for me to practice a CSS library - Styled Component. I am adding more games in the future.

MUSIC PLAYER

I love music so I built a simple music app. I can listen to my favourite list of music in my free time. I use three core technologies HTML, CSS and Javascript to build. It strengthened my basic knowledge of web app development.

SKILLS.

CODING TOOLS

HTML, CSS

Javascript

Reactjs

Git, Github

Tailwindcss

Sass

Styled Components

Netlify

DESIGN

Figma

Adobe Illustrator
